Sprint® available on several models.

When involved in factory maintenance or plant installation it is often difficult to be absolutely certain which size of fittings will be required. Pipe fittings provide a cost effective solution to this problem. The full range includes straight, L-shaped, T-shaped and cross piece male or female couplings and are available in a variety of thread sizes up to 3/4".

Material: brass OT58 UNI 5705 (nickel-plated).

The addition of the Camozzi **Sprint**® seal to twelve different models of pipe fittings eliminates the need to use liquid sealants or tape and save a considerable amount of time during installation. The **Sprint**® fitting can be connected and disconnected several times.

Material: brass OT58 UNI 5705 (nickel-plated).
